Norton Gardens LIBRAR RECEIVED No. 48 APR 27 1951 Publication Agricultude Hemerocallis by J. B. S. Norton MARCH, 1951 OTHER RECENT NUMBERS No. 40. Registration of hemerocallis clones. Plant Life 6:94-95. March, 1950. Hemerocallis seeds. News Letter. Hemerocallis No. 41. Society. April, 1950. Variation in daylily clones. 1 c. June, 1950. Double hemerocallis flowers. The Hemerocallis No. 42. No. 43. Society, Yearbook, 1950: 39-40, July, 1950. Hemerocallis from seed to seed. 1. c. 41-45. No. 44. Registration of hemerocallis clones. Plant Life No. 45. 7:76-77, Feb. 1951. No. 46. Daylily bargains, Aug. 1950. No. 47. Corrigenda: Descriptive catalogue of hemerocallis clones. Plant Lire 7:77-78. Feb. 1951. PRICE LIST FOR SPRING, 1951 J. B. S. Norton, 4922 Fortieth Place, Hyattsville, Md. Prices are for divisions shipped prepaid on orders of \$2.00 or more; 25 cents extra for smaller amounts. Prices 10% less for delivery at the garden or on orders of \$10 or Each week in the blooming season, the best of each

Each week in the blooming season, the best of each kind and color is marked with a * and a few of these with * * as the cream of all. See two star list. Those that do not get a * for at least one week are discarded

that do not get a * for at least one week are discarded. The different kinds of hemerocallis are listed alphabetically and numbered. After each name the originator or author's name is given in (); then the usual height in feet; next the season of bloom, EE, very early, (these need protection from late frosts), E, late spring, EM, early summer, M, midsummer, L, late summer, VL, very late; many early kinds bloom again in September or October. The colors are grouped under the most common related color names. Daylily colors vary with light, temperature, moisture and time of day. Other characteristics may be found under the lists of number given later.

Let me know what to do if I am out of some you order as the supply of some kinds is quite limited. I may be able to send a similar better one. There are several hundred newer, better daylilies in the garden in too small number to list. What do you want? I might spare a few.

Dayliles succeed under a great variety of conditions. They bloom for two to six weeks, from spring to late fall, nearly all colors and color combinations except blue and white. They are hard to kill. Favored planting times are April and August, or just after blooming. They are usually at their best the third year after planting.

Visit our Garden about May 20 to see most early hemerocallis in bloom; June 10 to 20, to see the Japanese Iris Garden. July 10 is the peak of bloom for the hundreds of kinds of summer blooming daylilies, and soon after Lilium superbum, wild among the iris. In mid-August our new late hemerocallis hybrids are in flower. But a visit each month from March to November is needed to see all our 2,700 kinds of plants in bloom.

There are near 650 named kinds of daylilies, and thousands of unnamed hybrids to be seen; also all kinds of plantain-lilies (Hosta, Funkie), fine shade flowers.

These iris are ideal for wet acid land. Come and get them while in bloom. We do not ship iris. The best way to know what you want is to see them in bloom.

1.	Amaryllis (Betscher), 2-3, M, yellow	\$2.00
2.	Apricot (Yeld), 2, EE, yellow	.60
	Aprilet (Norton), 1-2, EE, orange
